PROFILE

Full-stack MERN developer with hands-on experience building scalable web applications, including an e-commerce platform with authentication and admin dashboard. Skilled in JavaScript, REST APIs, and backend architecture (MVC), with a focus on performance and clean code.

EDUCATION

Bachelor of Technology (B.Tech), Artificial Intelligence & Data Science
Arya College of Engineering and IT, RTU | Jaipur

2022 – Present

PROJECTS

FashionStore – Full Stack E-Commerce Application

- Developed a full-stack e-commerce application with authentication and admin dashboard, managing 20+ products and role-based access for admin and users.
- Built real-time cart system using React Context API, handling dynamic updates for 10+ items with instant UI re-rendering.
- Designed responsive UI using Tailwind CSS with 15+ reusable components, improving user experience and consistency across pages.
- Integrated 5+ REST APIs for product, user, and order management using Axios.
- Implemented JWT-based authentication and protected routes for secure user access.
- Implemented secure environment variables and structured backend using MVC architecture.

Personal Portfolio Website

- Developed a fully responsive personal portfolio with 5+ sections, showcasing projects and skills with dynamic rendering.
- Built backend contact system using Node.js and MongoDB, handling form submissions with validation and secure data storage.
- Implemented dark mode and interactive UI using JavaScript, improving user engagement and accessibility.
- Deployed application on Netlify with optimized performance and fast load times (<2s).
- Managed version control using Git and GitHub with structured commits and project documentation.

Weather Web App

- Developed a responsive weather application fetching real-time data for 100+ cities using REST APIs.
- Integrated third-party API to display temperature, humidity, wind speed, and weather conditions with dynamic UI updates.
- Implemented input validation and error handling, reducing invalid API requests by ~30%.
- Optimized user experience with loading states and fast API response handling.
- Deployed application using GitHub Pages with seamless access and performance optimization.
- Implemented local storage to cache recent searches, improving usability and reducing redundant API calls.

SKILLS

- Programming Languages: C, Python, JavaScript
- Frontend: HTML, CSS, React.js, Tailwind CSS
- Backend: Node.js, Express.js
- Database: MongoDB
- Tools: Git, GitHub
- Core Concepts: OOPS, REST APIs
